Power Switch Wiring Directions

🟡 **Gold Color Terminal**

*****Black wire from Speed Controller**

Red wire from Speed Controller

Power Switch

Blue wire from Speed Controller

⚪ **Silver Color Terminals**
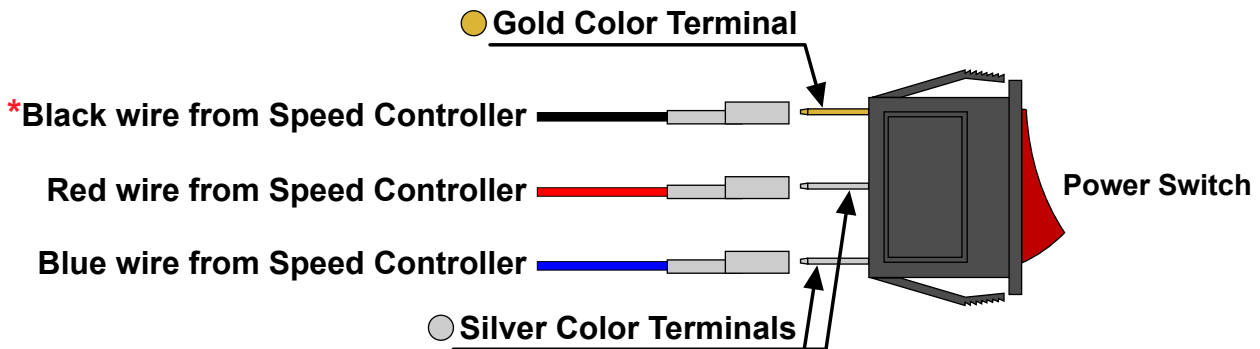

⚠️ *****The black wire from the speed controller must be plugged into the gold color power switch terminal otherwise damage to the controller and other parts will occur.**

If the power switch does not have a gold color terminal then it is not the right switch for the vehicle and it must be replaced with the correct switch before installing the kit.
