

RAZ-EKIT10

Wiring Directions

The new throttle included with this kit must be used for the installation.

Do not plug the original throttle into this kit's controller or controller damage may occur.

Power Switch Wiring Directions

*The black wire from the charger port must be plugged into the gold color power switch terminal otherwise damage to the controller and other parts will occur.

If the power switch does not have a gold color terminal then it is not the right switch for the vehicle and it must be replaced with the correct switch before installing the kit.
